Profile

Aiming to become a data scientist analyzing physical activity and sports data within health informatics. Interested in leveraging digital twins and generative AI to model physiological and psychological responses and develop personalized exercise interventions and injury prevention strategies.

Research Interests: Exercise and Sports; Sports Injury; AI twins; Computational Modeling; Public Health

Education

University of Seoul

Master of Science in Exercise Physiology ; GPA: 3.72/4.00

Seoul, Korea

2024 – 2026

University of Seoul

Bachelor of Science in Sports Science; GPA: 3.71/4.00

Seoul, Korea

2022 – 2024

Research Experience

University of Seoul, Exercise Physiology Lab (*Research Assistant*)

Sep 2025 – Mar 2026

Conducted an injury epidemiology study in amateur American football players. Primarily responsible for statistical analysis and manuscript writing, while contributing to study design and survey development.

National Research Foundation of Korea (*Principal Investigator*)

Jul 2024 – Jul 2025

Investigated the effects of an 8-week resistance training intervention on inhibitory control and behavioral addiction in adults with smartphone overdependence. Led the overall research process and manuscript preparation, supported by two researchers.

University of Seoul, Graduate School of Sport Science (*Research Assistant*)

Mar 2025 – Jul 2025

Investigated the effects of aerobic and resistance exercise interventions on balance ability in adults with smartphone overdependence. Led the overall research process and manuscript preparation, supported by two researchers and a supervising professor.

Ministry of Education (*Research Assistant*)

Mar 2023 – Apr 2024

Investigated the effects of core-based exercise on cognitive function in patients with stroke. Contributed to data collections and conducted a systematic review.

University of Seoul, Exercise Physiology Lab (*Research Assistant*)

Sep 2022 – Nov 2022

Investigated the effects of eye movement training on cognitive function in older adults with mild cognitive impairment. Conducted transcranial Doppler (TCD) measurements to assess cerebral blood flow.

Publications

Lee, H.C. & Oh, Y.S. (2026). Effects of 8 weeks resistance training on smartphone dependence, anxiety, depression, and inhibitory control in young adults with smartphone overdependence (Master's thesis).

Lee, H.C., Lee, J.H., & Ha, M.S. (2024). Role of core-based exercises in improving proprioception among individuals with neurological disorders: A systematic review and meta-analysis. *Exercise Science*, 33(2), 149–159.

Lee, H.C., Lee, J.H., & Oh, Y.S. (2024). Exploration of risk factors for sequelae after injuries in recreational sports participants and application of a nomogram. *Korean Journal of Physical Education*, 63(6), 767–780.

Lee, J.H., Lee, H.C., Jeong, H.N., Ha, M.S., & Oh, Y.S. (2024). Mediation effect of skill levels in the relationship between participation and injury experience among leisure sports participants. *Korean Journal of Sport Science*, 35(1), 170–180.

Lee, J.H., Lee, H.C., & Oh, Y.S. (2024). The effects of aerobic exercise on blood lipids in middle-aged obese Korean women: A systematic review and meta-analysis. *Journal of the Korea Convergence Society*, 13(10), 435–450.

Conference Presentations

- Lee, H.C.** & Oh, Y.S. (2024). Exploration of risk factors for sequelae of injuries among recreational sports participants and application of a nomogram. *62nd Academic Conference of the Korean Society of Sport Sciences* (Oral)
- Lee, H.C.** & Ha, M.S. (2024). Comparative study of wearable device accuracy in heart rate monitoring. *Spring Conference of the Korean Society of Exercise Nutrition* (Oral)
- Lee, H.C.**, Lee, J.H., & Ha, M.S. (2023). Can trunk stability exercise improve cognitive function: Review and future directions. *35th International Sport Science Congress* (Poster)
- Lee, H.C.**, Lee, J.H., & Ha, M.S. (2023). Effects of physical activity levels on blood lipids, insulin resistance, and cytokines in childhood obesity. *International Congress on Obesity and Metabolic Syndrome* (Poster)
- Lee, H.C.**, Lee, J.H., & Ha, M.S. (2022). Impact of trunk stability exercise on gait, balance, and cognitive function in stroke patients: A review. *34th International Sport Science Congress* (Poster)

Funding & Scholarships

Master's Research Grant, National Research Foundation of Korea (2024)

Graduate Research Fellowship, University of Seoul (2025)

Pfizer Scholarship, Pfizer (2023)

Scholarship, Seoul Scholarship Foundation (2023)

University of Seoul Scholarship (2022–2025)

* Academic Excellence Scholarship; Top Student Honor in Sport Science; UOS Talent Scholarship; Global Leader Scholarship

Awards

National

Excellence Award, Korea Institute of Sport Science (2025)

Award from the President of the Korean Society of Physical Education (2024)

Best Poster Award, Korean Society of Exercise Physiology (2023)

University of Seoul

Best Research Paper Award, University of Seoul (2025)

Excellence Research Paper Award, University of Seoul (2024)

Field Training Blog Competition Award from the President of the University of Seoul (2022)

Department of Sports Science

Outstanding Oral Presentation Award, University of Seoul (Lab Festival) (2024)

Outstanding Poster Presentation Award (Lab Festival), Department of Sports Science, University of Seoul (2022)

Academic Excellence Award (Top Student), Department of Sports Science, University of Seoul (2022)

Other Activities

Elite Football Player (2010–2019)

Military Service (2019–2021)

Volunteer Work in Cambodia — Physical Education and Physical Activity Instructor (Jan 3–16, 2023)

Exercise Specialist (Metabolic Syndrome), Public Health Center (Sep 2025–Mar 2026)

Research Intern, Exercise Physiology Lab, University of Seoul (2023–2024)

Teaching Assistant — Tennis, Soccer, Water Skiing, and Ski Courses, University of Seoul (2023–2025)
